

Palouse Audubon Society 2026 Student Grant Application

The Palouse Audubon Society will award two \$1,500 grants to fund research supporting our mission of promoting education, conservation, and restoration of natural ecosystems, focusing on wildlife and their habitats. There are no restrictions on how the funds may be used but we ask that grantees present their work at a Palouse Audubon Society program in the spring of 2027.

Please send this form and your proposal to palouse-audubon-grants@googlegroups.com no later than March 31, 2026. The proposal should include your research objectives, hypotheses to be tested, and methods. Limit your proposal to two pages.
